Executive Summary

TechNavio Announces the Publication of its Report – Global Teleradiology Market 2011–2015

TechNavio today launched its report Global Teleradiology Market 2011–2015 based on an in-depth study covering the Americas, and the EMEA and APAC regions. The report aims to aid decision makers' understanding of the key trends impacting this market.

Commenting on the report, an analyst from TechNavio's Healthcare said; "The Global Teleradiology market is experiencing a significant increase in the number of product approvals. For instance, SHL Telemedicine Ltd. introduced a new portable device to transmit a 12-lead ECG (Cardio'B) in 2011. Honeywell HomMed LLC launched Telehealth Ecosystem in 2007. WorldCare Clinical LLC launched WorldPRO Technology Software Platform in 2010. Also, the Apollo group of hospitals and IBM established a "health super highway" by connecting 150 hospitals in 2007."

According to the report, the Teleradiology market has a large presence in the Telemedicine market in the EMEA region. The UK has been one of the frontrunners in the Healthcare industry in the EMEA region. Thus, the Teleradiology market in the EMEA region is expected to respond positively to the development of e-health initiatives by the NHS and is expected to witness a growth rate that is higher than that of the global market over the forecast period.

Further, the report also discusses that the lack of common standards and proper classification of telemedicine applications is expected to restrict the growth of the Global Teleradiology market.

The study was conducted using an objective combination of primary and secondary information including inputs from key participants in the industry. The report contains a comprehensive market and vendor landscape in addition to a SWOT analysis of the key players.
