

BESPOKE SOLUTIONS FOR

TELERADIOLOGY

Radiology Challenges

7 signs that makes healthcare providers opt teleradiology

Shortage of subspecialty radiologists

Increasing reporting time

Radiologist unavailability in emergency

Backlog examinations are high

Difficulty in scheduling radiologists after hours

Radiologist burnout

Inefficiencies in operating multi-center radiology setup

Demand for imaging services continue to outpace radiologist availability globally. With imaging playing a central role in modern healthcare, managing the average workload per radiologist is the primary concern for radiology departments worldwide.

A radiologist plays a critical role in patient care. Radiologist burnout has become an issue and medical errors can turn out to be fatal. For reasons of geography and economics it may not always be feasible to recruit additional full time radiologists to the existing staff. In such scenarios teleradiology can be of value.

Harnessing the Power of Distributed Radiology

Founded in 2002 by two Yale trained physicians, Teleradiology Solutions (TRS), is rated the **No.1 national teleradiology company** in the United States and Best in KLAS, is joint commission **(JC) accredited since 2005**. We provide quality emergent and non-emergent reporting services which covers both day and night time on both weekdays and weekends. We cover **25+ states across the US** with radiologists **licensed in 42 states** across united states. With a global radiology workforce and a follow the sun model we are well equipped to provide **24x7/365 days coverage**.

Using Digital Technology to Connect and Care

Our collaborative environment helps healthcare providers extend their hours and depth of subspecialized coverage for their patients, referring physicians, and hospital partners to provide quality care.

Our Offerings

Prelim ER Reads (Wet Reads)

Vacation Coverage

Final Reads

Daytime Coverage

Subspecialty Reads

Quality Assurance/Peer Review Reads

Routine, Overflow & Backlog Coverage

3D Rendering

Our Metrics

99.7%
Reporting accuracy

< 15 min
for stroke

< 30-45 min
for trauma

< 60 min
for ER cases

Time to intervention is critical. As specialists in emergency radiology, we provide support to radiology departments working round the clock. Our after-hours service means your hospital always has immediate access to consultant level radiologists real time.

Our strong line of communication between the radiologist and physician bridges the gap. This facilitates smooth handling of cases with recommendations and suggestions for followup and further imaging if required.

Nighthawk Services

Super Speciality

Services

Our team of radiologists provide subspecialist coverage without the cost and challenges involved with a local hire. 80% of our radiologists are subspecialty trained radiologists with an average of 20 years of experience and well equipped to provide subspecialty radiology reports of global standards.

We ensure that irrespective of the situation, you're prepared with a clinical resource to provide a preliminary/final report, empowering you to make better decisions for patients.

Tele3D Services

3D imaging allows physicians to diagnose and treat patients with confidence and clarity. Our collaboration with **Massachusetts General Hospital (MGH)** to perform 3D post processing services offers precise, anatomical visualizations and analyses to enhance patient care.

We have been at the forefront of this technology for nearly two decades, and our dedicated staff is specially trained to generate 3D views using protocols tailored to the clinical needs of over 45 types of exams.

Your Partner in Progress

Right Quality

We follow ACR protocols and standards for quality assurance and peer review on our radiology reports.

Right Process

Our credentialing, licensing & privileging protocols are maintained to the JC standards. JC expedited credentialing possible.

Right People

Our 40 plus American board certified radiologists are mostly subspecialty trained.

Right Technology

Our advanced teleradiology workflow (RADSpa) substitutes time-consuming, error-prone and manual processes.

Real Time Communication

You can always connect with our 24/7 support and speak with a radiologist as if they were onsite.

Registered Licensing

We have existing licensing in 42 states across the United States of America.

Regulatory Compliance

We have written IPS policies to address potential threats to PHI security, HIPAA and other applicable legal requirements.

High quality reporting

Follow the sun principle for best rad coverage

Our ability to integrate complex workflows such as prelims, finals or both using HL7 or API interfaces across most commonly used platforms RIS-PACS

A seamless technology platform which is HIPAA compliant

Full services including complete billing for PC component for radiology
