CUSTOMIZED SOLUTIONS FOR
TELERADIOLOGY

Radiology Challenges

7 signs That Your Organization Will Benefit From Teleradiology

Radiologist Unavailability In Emergency

Increasing Reporting Turnaround Time

Backlog Examinations Piling Up

Shortage Of Subspecialty Radiologists

Difficulty In Scheduling Radiologists After Working Hours

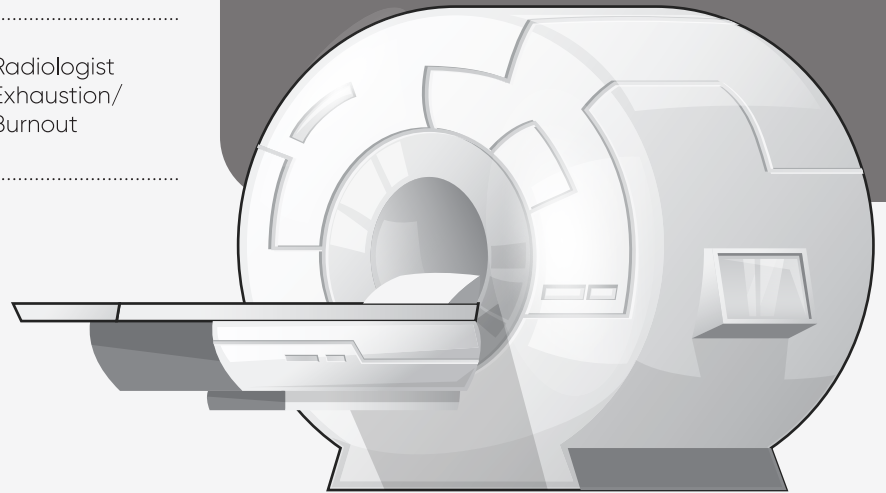

Radiologist Exhaustion/ Burnout

Unable To Distribute Cases For Reporting Over Multi-center Radiology Setup

Demand for Imaging services continue to outpace radiologist availability globally. With Imaging playing a central role in modern healthcare, availability of radiologists and managing the average workload per Radiologist is the primary concern for Radiology departments worldwide. A Radiologist plays a critical role in patient care. Shortage of Radiologists has become an issue. Recruitment of full time Radiologists may be a challenge. In such scenarios Teleradiology can be of great value.

Harnessing the Power of Distributed **Radiology**

Founded in 2002 by two Yale trained physicians, Teleradiology Solutions (**TRS**), has been rated the **No.1 National Teleradiology Company** in the United States and Best in KLAS, and has been Joint Commission (**JC**) **accredited since 2005**. We provide high-quality emergent and non-emergent reporting services which covers both day and night time on both weekdays and weekends. We report for **150+ hospitals in 25 countries, 50+ hospitals in Non-USA** and have experience of reporting more than **6 million scans** over two decades. With an experienced global Teleradiology workforce, we deliver reports as per your Radiology needs.

Using **Digital Technology** to Connect and Care

Our collaborative environment helps healthcare providers extend their hours and depth of subspecialized coverage for their patients, referring physicians, and hospital partners to provide quality care.

Our Services

Routine, Overflow & Backlog Coverage

Subspecialty Reporting

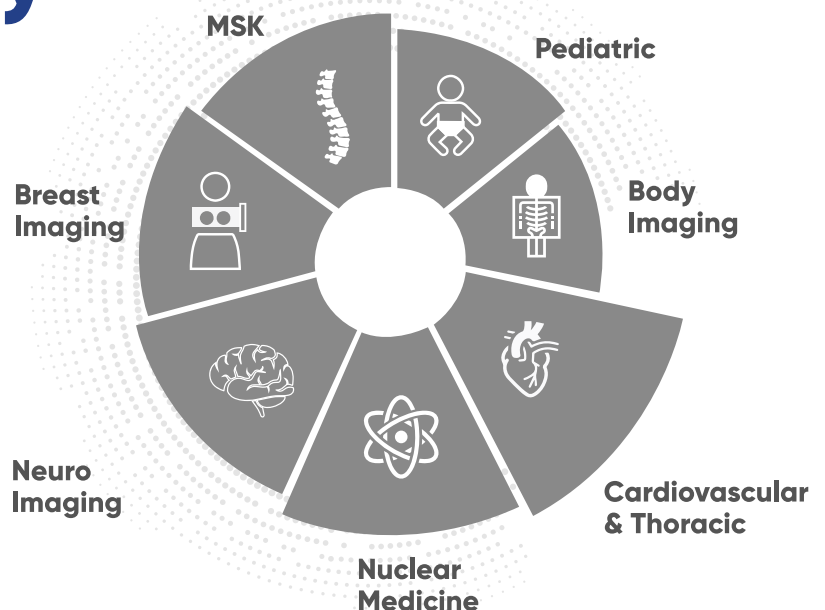

Quality Assurance/Peer Review

3D Post Processing

Superspeciality Services

Our team of Radiologists provide subspecialist coverage without the cost and challenges of recruiting full-time staff. Our subspecialty trained Radiologists are well-equipped to provide high quality subspecialty Radiology reports of Global standards.

QA/Peer Review Services

Quality Overread is a peer review of the reports of a Radiologist to assess the quality and in turn, ensure compliance with the standard of patient care. We provide overread services wherein our Radiologist group performs retrospective reviews on specific Radiologists reports as per the client's request and grade them based on the American college of Radiology peer review scoring system.

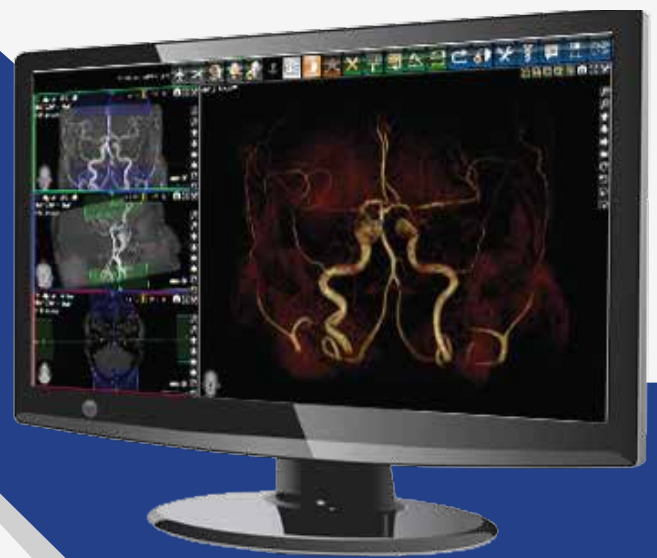

Routine, Overflow & Backlog Reporting

Our backlog and overflow reporting takes some of the stress off your radiologists, helps in keeping report turnaround time low and improves patient outcome.

Tele3D Services

3D Imaging allows physicians to diagnose and treat patients with confidence and clarity. Our collaboration with **Massachusetts General Hospital (MGH)** to perform 3D post processing services offers precise, anatomical visualizations and analysis to enhance patient care.

We have been at the forefront of this technology for nearly two decades, and our dedicated staff is specially trained to generate 3D views using protocols tailored to the clinical needs of over 45 types of exams.

Your Partner in Progress

Right Quality

We follow ACR protocols and standards for quality assurance and peer review on our Radiology reports.

Right Process

Our credentialing, licensing & privileging protocols are maintained to the JC standards.

Right People

We have a network of more than 150+ Radiologists comprising of American board certified (ABR), Fellow of the Royal College of Radiologists (FRCR) and Indian board certified Radiologists.

Right Technology

Our advanced Teleradiology workflow (RADSpa) substitutes time-consuming, error-prone and manual processes.

Real Time Communication

You can always connect with our 24/7* support and speak with a Radiologist as if they were onsite.

Radiology Coverage

24x7* access to our talented pool of Radiologists to assist you through such conditions as overflow, weekend coverage or emergency situations.

Regulatory Compliance

We have written IPS policies to address potential threats to PHI security, HIPAA and other applicable legal requirements.

Two decades of reporting experience

High-quality reporting, including Routine, Overflow & Backlog, Subspecialty reporting

Strong QA process with dual review system modeled on the ACR peer review process

Transparent pricing with pay-as-you-go model

A seamless technology platform which is HIPAA compliant

Anonymization Modules for Data Privacy
